

VISEC® PLATINUM PLUS⁺

Visec® provides the most friendly TCP/IP PLC Graded Industrial I/O integrated automation and control solution for IP surveillance.

Overview

Visec® Platinum PLUS provides live video IP/Analog Cameras to be associated with an Input/Output event. This means that when security operators want to see what has caused an alarm, they simply right-click on an event and take a look. Moreover, the Multi Screen views will highlight with a flash and sound an alarm, triggered by the input/LPR event. Any output action can be executed upon pre-configured events, like switching on lights, sounding an alarm, opening a boom, etc.

The expandable Remote I/O Solution from MOXA connects a variety of sensors, and electrical, electronic, mechanical devices—temperature, humidity, and light sensors, pressure transmitters and motors, serial devices, and more—to Visec® Platinum PLUS over standard Ethernet/Wireless/Internet/PLC networks.

VISEC® PLATINUM PLUS⁺

Supports Full IP Megapixel Cameras

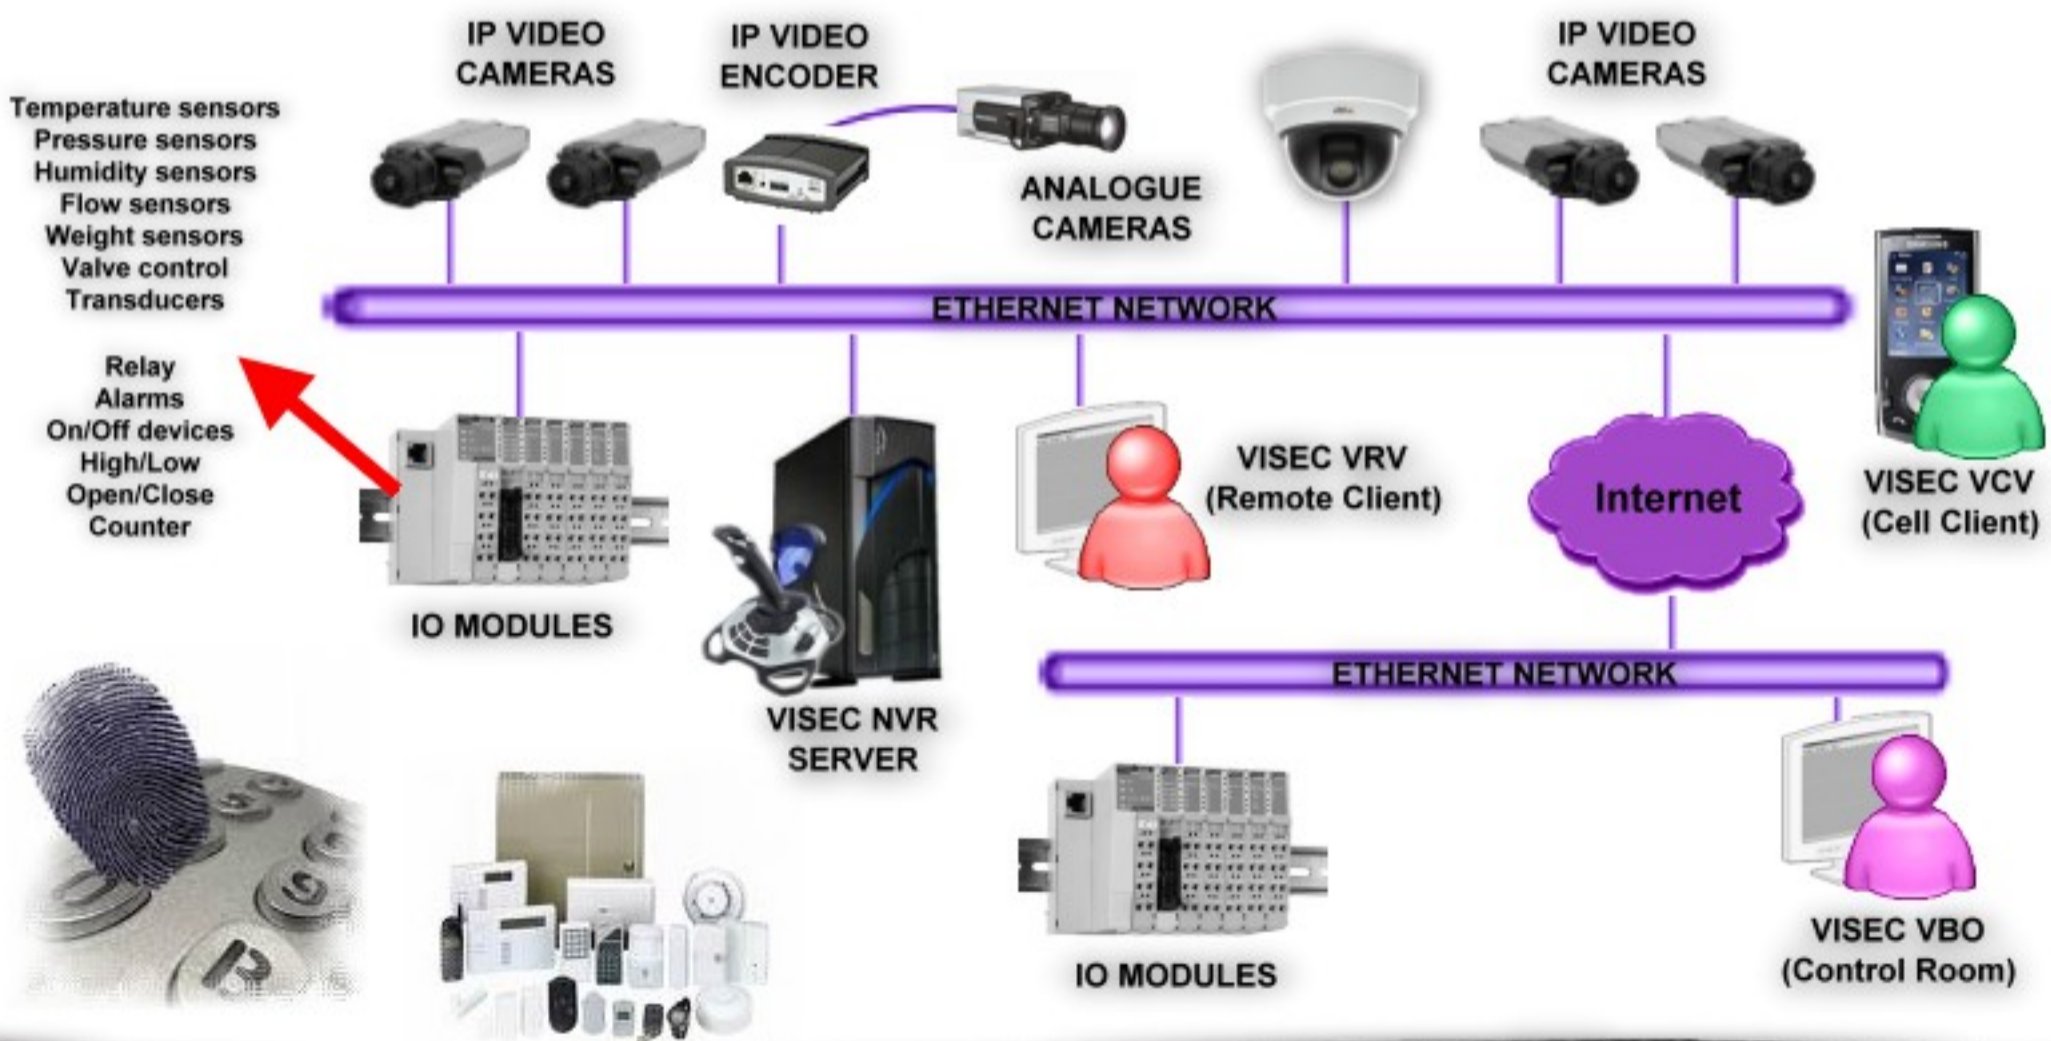

- > View and record up to 64 cameras per server
- > Motion, Scheduled and event driven recording
- > LAN/WAN Input/Output Event Control
- > Powerful and Fast recording search
- > Expandable up to 32 modules for a maximum of 512 Digital Input/Output points
- > Support up to 8 Multi Monitors
- > Support up to 4 Multiple PTZ controls
- > No per camera licensing required
- > Remote viewing and playback
- > Compatible with most SCADA software
- > Supports traditional Analogue CCTV technology
- > Compression methods: MJPEG & *H.264

*to be released Sep/Oct 2008

IP video of the Future

Visec® Platinum PLUS interfaces with the widest choice of network video, networked Input/Output MOXA devices and computer hardware equipment – easy to install and easily scalable for future expansions.

VISEC® PLATINUM PLUS⁺

Applications

Building Automation

Make your building smarter using surveillance with our I/O solution

Intelligent Transportation Systems

Modern IP surveillance networking products help make transportation systems smarter and easier to manage

Factory Automation

Plant surveillance requires automation and control

Access Control

Existing Access control equipment integrated with IP surveillance

Perimeter Detection

Make your Perimeter more intellegent with IR/Microwave communicating with Still/PTZ cameras

Intelligent Transportation for Highways

Automated tollgate systems using LPR and boom control

Traffic Management

Automatic Law enforcement with LPR for Red light infringement

Emergency Reaction

Automate panic alarms with Intelligent surveillance

Multi-vendor IP camera / video server support
